

STEELNATION™ ENVIRONMENTAL

LANDSCAPE SUPPLY • EROSION & SEDIMENT CONTROL

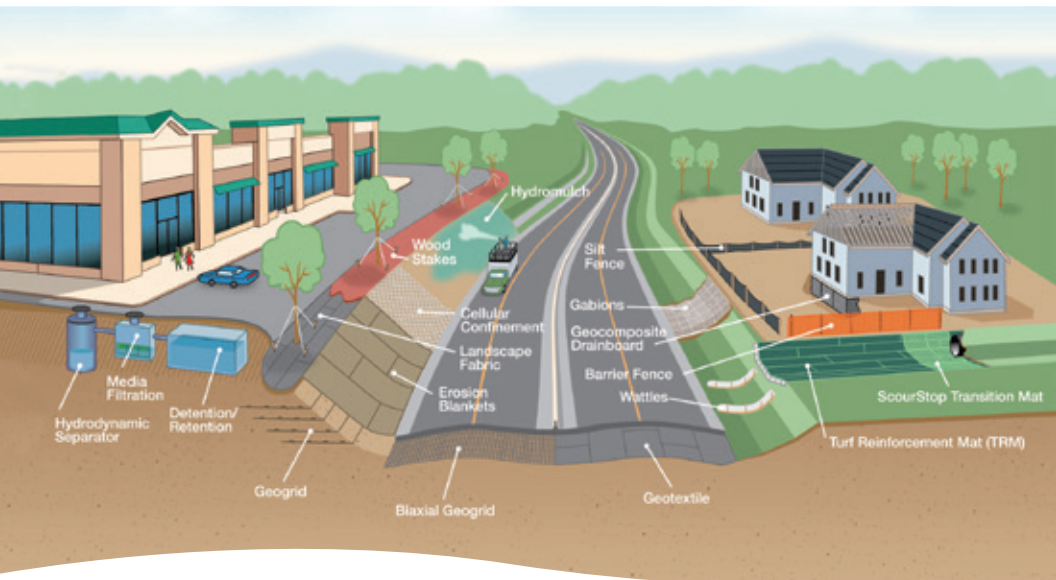

ABOUT US

Steel Nation Environmental provides all the landscaping supplies you need for industrial, commercial, and residential use.

Steel Nation Environmental is a full-service landscape, erosion/sediment control supply and installation company. We offer a comprehensive product line of aggregates including decorative rock, limestone, gravel, and sand, as well as retaining walls, drainage systems, erosion control blankets and silt socks. We can provide chain link fencing, silt fencing and site fencing. We're a one-stop shop for commercial and retail landscaping needs.

We closely monitor the marketplace for innovative product technologies to offer our customers a competitive edge. From our centrally-located supply yard in Canonsburg, PA, we can promptly respond to the needs of our customers, both big and small. Special orders are welcome. Additionally, we offer turnkey solutions for clients who need design and installation of retaining walls and fencing, as well as excavating and land clearing services for their E&S control projects.

STEEL NATION[®]
ENVIRONMENTAL

AGGREGATE

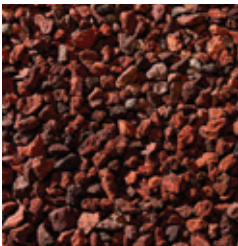

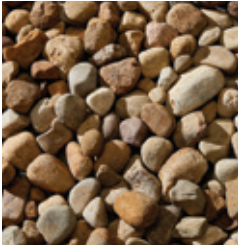

Types

- Limestone 1A Dust
- Limestone 2A Modified
- Limestone 1B
- Limestone 2B
- Limestone #3
- Pea Gravel
- 2B Gravel
- Fill Sand

We offer a wide variety of coarse particulate material including sand, gravel and crushed stone. Aggregates are used in the building, roadway, and railway construction industries, as well as for decorative landscape borders.

DECORATIVE ROCK

Quality decorative rock enhances any commercial or residential landscape design. Choose from a variety of textures, shapes and sizes. In stock or by special order.

Types

- #3 River Rock
- #4 River Rock
- Red Barn Limestone
- #3 Shore Rock
- Vanilla
- Mocha Stone
- Lava Rock

ALLAN BLOCK

Allan Block's patented raised front lip is one of the key design features. The raised front lip and corresponding notch on the bottom of each block allows for blocks to be molded with varied setbacks. The hollow core design and closed cell configuration provides many benefits which add to the working stability and success of the system.

Village Garden Wall Collection

The Versa-Lok® segmental retaining wall is the most versatile retaining wall system on the market. Versa-Lok walls are made of high-strength concrete units, dry-stacked, interlocked with pins, and set on granular leveling pads. These mortar-less walls require no footings below frost levels. And when stabilized with geogrid soil reinforcement walls, Versa-Lok retaining walls can be built 50 feet tall and even higher.

Products

- Versa-Lok Block
- Versa-Lok C-Caps 6" X 11G Sod
- Versa-Lok Half
- Versa-Lok Full Return Corner
- Versa-Lok Tuff Pins
- Versa-Lok Cap Adhesive 110z
- Versa-Lok Geo Grid
- Versa-Lok Block Bond 280z
- Polymeric Sand Beige
- Polymeric Sand Grey
- Versa-Lok Lifter
- (Available Colors)
- Sandstone, Saratoga, Desert,
- Allegheny, Sierra, Williamsburg,
- Slate, Newport

GEOTEXTILES

Steel Nation Environmental geotextiles and geogrids are engineered to meet the challenging demands of your specific project, whether in general construction, earth stabilization, erosion control, water/wastewater management and shoreline protection.

SEDIMENT CONTROL

Fence types

Super Silt Fence

Commercial Pre-assembled Silt Fence

Check Dams

Triangular Silt Dike

Travel Lane Wattle

Fiber Filtration Tubes

Silt fence products control runoff from construction sites where the soil has been disturbed. Silt fence stops the water containing sediment long enough for the sediment to drop out while the water passes through the fabric.

SEEDING & HYDROSEEDING

Types

Hydro Mulch

Wood Fiber

100% Paper Mulch

Wood Fiber 70/30 with tack

70/30 Mulch

Tackifier

Hydroseeding offers many advantages over the conventional seeding process, such as quicker, more uniform germination, reduced labor costs and superior erosion control. Virtually any grass or ground cover planted by seed can be planted by hydroseeding.

GRASS SEED & FERTILIZER

High-quality grass seed and fertilizer mixes are available for residential, commercial pasture, pipeline and erosion and sediment control projects. Pre-formulated and custom mixes are available, many in stock.

Types

- Contactors Mix
- Annual Rye
- Dot Form B
- Seed Mix
- Penn State Mix
- Pipeline Mix
- Fertilizer 18-24-12
- Shade Mix

EROSION CONTROL BLANKETS

Types

Curlex NetFree Blankets

AEC Premier Straw

Curlex CL Blankets

Curlex Original Erosion Control Blanket

AEC Premier Straw/ Coconut Blankets

Curlex Double Net

Curlex III

Erosion control blankets are natural materials that are used to protect terrain from wind and water erosion. Our blankets create an excellent micro-climate for the propagation of seeds, keeping nutrients in and weeds out. Biodegradable erosion-control blankets expand when wet, then slowly release moisture back to the seeds for germination. The weed barrier fabric allows air to circulate, controlling surface temperature and reducing soil compaction and watering frequency.

FILTER SOCKS

Filter socks are sediment control devices engineered to divert, control and trap sediment and debris during and after construction where the soil has been disturbed. We offer a wide variety of lengths, sizes and brands to meet your specific requirements.

Types

8" x 160'

18" x 150'

12"x100'

24'x30'

Big Switch

Switchgrass Filtration/
Erosion Control Sock

FENCING

We offer quality fencing products for commercial, industrial, energy and residential projects, including a variety of chain link fences in a range of heights and sizes. At Steel Nation Environmental you can also find PVC and temporary fencing. We also provide state-of-the-art technology in control entry and exit doors and gates, and other safety systems.

MULCHES

Add a layer of decorative mulch to the surface of your soil to enhance the visual appeal of the area. Mulched gardens require less watering, less weeding, and improves the health and fertility of the soil.

Types

Undyed Double Shredded

Red Chipped

Black Double Shredded

Black Chipped

Brown Double Shredded

Brown Chipped

Mushroom Manure

Top Soil

EXCAVATION

We offer complete excavating services for residential, energy and commercial projects, including:

- Residential Site Development
- Commercial Site Work
- Driveways
- Erosion Control
- Demolition
- Shoreline Rip Rap
- Ponds

SITE CLEARING

Steel Nation Environmental offers professional land clearing and wood recycling services. We can clear any size tract of land and right-of-way.

- Stump Grinding
- Tree Removal and Disposal
- Brush Removal
- Site Clean-Up
